

Introducing the market's first single use 10-pack of tab electrodes.

## FEATURES

### Traceability

Each single-use pack is lot coded and has expiration dates.

### Hygienic, Disposable Single-Use Packs

Eliminates risk of cross contamination of unused electrodes.

### Improved Functionality

Eliminates electrode failure due to improper sealing and storage of unused electrodes.

### MR Conditional Tab Electrodes

Can be worn (but not used) during MRI procedures.

The Joint Commission (TJC) is mandating multi-use packages be documented for first use and expiration dates. Single-use packs eliminate the need to document these dates. Single-use pack electrodes also provide a solution to assist in compliance with IC.02.02.01 standard for infection control.

### A10202-10 - 34mm x 23mm - C/AgCL

| Product # | Per Pouch | Per Box | Per Case | Solid Gel   | Duration of Use   |
|-----------|-----------|---------|----------|---|---|
| A10202-10 | 10        | 500     | 4000     |  | <br>< 24 Hours |

3-13-01-065 (11/2019)
